SARCOVYN® *Medical Muscle Recovery*

WHY HMB?

HMB is a clinically proven metabolite of leucine that helps prevent muscle breakdown.

It works by:

- ✓ Reducing muscle protein degradation
- ✓ Enhancing muscle protein synthesis
- ✓ Improve strength & physical performance

Safety Profile

- No-significant drug interactions
- Safe with antidiabetics & antihypertensives
- Well tolerated

"Proteins build muscle, but HMB prevents muscle loss."
